HEALTH BENEFITS TERMINOLOGY

Adjudication: Refers to the process of paying claims submitted or denying them after comparing claims to the benefit or coverage requirements.

Administrative Services Only (ASO): An arrangement under which an insurance carrier or an independent organization will, for a fee, handle the administration of claims, benefits and other administrative functions for a self-insured group but does not assume any financial risk for the payment of benefits.

Balance bill: The amount you could be responsible for (in addition to any co-payments, deductibles or coinsurance) if you use an out-of-network provider and the fee for the particular service exceeds the allowable charge.

Calendar Year Deductible: The dollar amount for covered services that must be paid during the calendar year (January 1 – December 31) by members before any benefits are paid by the Plan.

Centers of Medical Excellence (CME): Health care providers designated as a selected facility for specified medical services. Providers participating in a CME network have an agreement to accept an agreed upon amount as payment in full for covered services.

Coinurance: An arrangement under which the member pays a fixed percentage of the cost of medical care after the deductible has been paid. For example, an insurance plan might pay 80% of the allowable charge, with the member responsible for the remaining 20%, which is then referred to as the coinsurance amount.

Coordination of Benefits: This is the process by which a health insurance company determines if it should be the primary or secondary payer of medical claims for a patient who has coverage from more than one health insurance policy.

Co-Payment: A specific charge that a health plan may require a member to pay for a specific medical service or supply, after which the insurance company pays the remainder of the charge.

Deductible: An amount the covered person must pay before payments for covered services begin. The deductible is usually a fixed amount. For example, an insurance plan might require the insured to pay the first \$250 of covered expense during a calendar year.

Dependent: Person, (spouse or child), other than the subscriber who is covered under the subscriber's benefit certificate.

Employee Assistance Program (EAP): A program that is designed to provide employees and their dependents with access to resources to support various life situations. It also provides confidential, short-term counseling by qualified practitioners, in person or virtually.

Explanation of Benefits (EOB): A form sent to the covered person after a claim for payment has been processed by the carrier that explains the action taken on that claim. This explanation might include the amount that will be paid, the benefits available, reasons for denying payment, or the claims appeal process.

Flexible Spending Account: Financial account that allows employees to set aside pre-tax money from their paycheck toward premiums or costs not covered by their health plan, such as co-payments. Generally, all the money must be used within the plan year or it is lost.

Health Assessment: A health screening that provides participants with basic health results and actionable steps for improving them.

Health Insurance Portability and Accountability Act (HIPAA): A federal health benefits law passed in 1996, effective July 1, 1997, which among other things, protects the privacy rights of health plan participants.

Health Maintenance Organization (HMO): A plan that offers a wide range of health care services through a network of providers who agree to provide services to members at a pre-negotiated rate. Members of an HMO choose a primary care physician who manages all healthcare and refers to specialists as needed.

Health Savings Account: A tax advantaged savings account to be used in conjunction with certain high-deductible (low premium) health insurance plans to pay for qualifying medical expenses, such as deductibles. Contributions may be made to the account on a tax-free basis. Funds remain in the account from year to year and may be invested at the discretion of the individual owning the account. Interest or investment returns accrue tax-free. Penalties may apply when funds are withdrawn to pay for anything other than qualifying medical expenses. Employers can also fund such plans.

ID Card/Identification Card: A card issued by a carrier to a covered person, which allows the individual to identify himself or his covered dependents to a provider for health care services.

IBNR: An acronym for "incurred but not reported". This is an accounting estimate used by health plans to accrue for care that was provided "incurred" in one accounting period, but not paid or "reported" until another accounting period.

In-Network: Refers to the use of providers who participate in the carrier's provider network. Many benefit plans encourage covered persons to use participating (in-network) providers to reduce the individual's out of pocket expense.

Medical Tourism: To have medical care outside the United States.

Medigap: Refers to various private health insurance plans sold to supplement Medicare.

Negotiated Rate: The amount participating providers agree to accept as payment in full for covered services. It is usually lower than their normal charge. Negotiated rates are determined by Participating Provider Agreements.

Open Enrollment: A time period during which eligible employees can select among the plans offered by their employer as well as make any other dependent changes.

Out-Of-Network: The use of health care providers who have not contracted with the carrier to provide services. Members are generally not reimbursed if they go out-of-network except in emergency situations.

Out-Of-Pocket: The most a member would pay for covered medical expenses in a plan year through copays, deductibles and coinsurance before your insurance plan begins to pay 100 percent of the covered medical expense.

Participating Provider: A physician, hospital, pharmacy, laboratory or other appropriately licensed provider of health care services or supplies, that has entered into an agreement with a managed care entity to provide such services or supplies to a patient enrolled in a health benefit plan.

Pre-Authorization: A procedure used to review and assess the medical necessity and appropriateness of elective hospital admissions and non-emergency outpatient services before the services are provided.

Preferred Provider Organization (PPO): A type of managed care organization that has a panel of preferred providers who are paid according to a discounted fee schedule. The enrollees do have the option to go to out-of-network providers at a higher level of cost sharing.

Reasonable and Customary: This refers to the standard or most common charge for a particular medical service when rendered in a particular geographic area. Also known as Usual, Customary and Reasonable (UCR).

Skilled Nursing Facility: An inpatient healthcare facility with the staff and equipment to provide skilled care, rehabilitation and other related health services to patients who need nursing care, but do not require hospitalization.

Subscriber: The individual in whose name a contract is issued or the employee covered under an employer's group health contract.

Transparency: The ability for patients to have easy access to understandable information about the cost and quality of their health care options. They should be able to obtain this information from their health plan and medical providers prior to the time of treatment.

Weight Loss Medication Discussion

Background^{5,6,8}

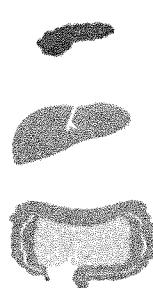

- Weight loss medications have been on the market for years, but recent use has skyrocketed due to the greater efficacy of newer products

Drug	Drug Class	Release Year	Mean Weight Loss
Diethylpropion IR/ER	Sympathomimetic amine	1959	*See footnote
Phendimetrazine IR/ER	Sympathomimetic amine	1959	*See footnote
Phentermine	Sympathomimetic amine	1959	*See footnote
Benzphetamine	Sympathomimetic amine	1960	*See footnote
Xenical (orlistat)	Lipase inhibitor	1999	2.5-3.4 kg
Qsymia (phentermine + topiramate ER)	Sympathomimetic amine and antiseizure medication	2012	6-12.6 kg
Contrave (naltrexone + bupropion)	Opioid antagonist and antidepressant	2014	3.7-5.2 kg
Saxenda (liraglutide)	Glucagon-like peptide-1 receptor agonists (GLP-1 agonists)	2015	5.6-8.4 kg
Wegovy (semaglutide)	Glucagon-like peptide-1 receptor agonists (GLP-1 agonists)	2022	7.1-16.8 kg

*Only approved for short term use. Most studies show only of a fraction of a pound lost per week

- The main class of medications we are concerned with are Glucagon-like peptide-1 agonists (GLP-1 agonists)
- GLP-1 agonists work in multiple ways:

A GLP-1 receptor agonist is a non-insulin medicine that acts like the GLP-1 in your body. The word *agonist* means that the drug or substance stimulates a response in your body by acting on a specific receptor. In type 2 diabetes, a GLP-1 receptor agonist works in a number of ways, some of which are:

- When blood glucose is high, the amount of insulin your pancreas releases after you eat is increased
- When blood glucose is high, the liver is stopped from making too much glucose
- Slows the emptying of the stomach's contents into the intestines

- These drugs improve control over blood sugar and generally lead to weight loss due to increase feelings of fullness and satiety
- Weight loss from these products varies but is typically around 10-15lbs

- GLP-1 agonists have been available to treat diabetes since 2015, but in more recent years products have been approved solely for weight loss

Drug Name	Indication
Mounjaro (tirzepatide)*	Type 2 Diabetes
Ozempic (semaglutide)	Type 2 Diabetes
Rybelsus (semaglutide, oral)	Type 2 Diabetes
Saxenda (liraglutide)	Weight Loss
Trulicity (dulaglutide)	Type 2 Diabetes
Victoza (liraglutide)	Type 2 Diabetes
Wegovy (semaglutide)	Weight Loss

*Mounjaro has a second mechanism, may soon be approved for weight loss

Coverage

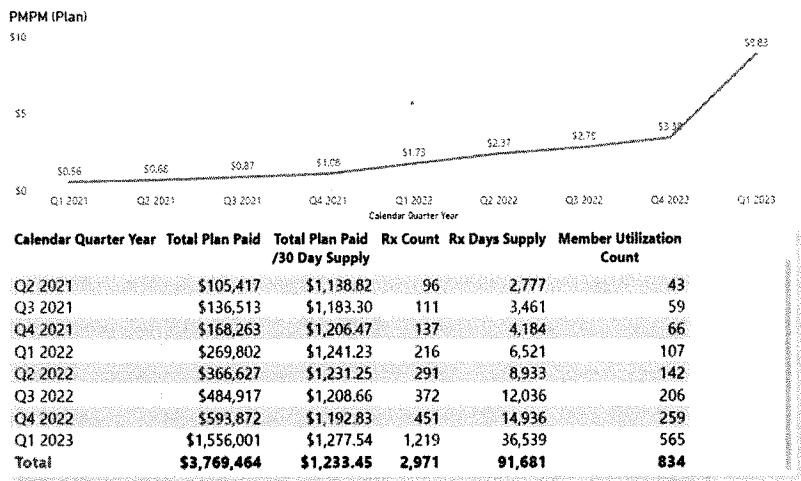

- Due to rising costs, many plans are electing not to cover medications exclusively for weight loss
- These drugs are considered “lifestyle medications” and there is no obligation to cover them as they are only approved for weight loss and no underlying conditions
- There has been concern about discrimination, but obesity is not considered a disability under the Americans with Disabilities Act and this exclusion does not constitute discriminatory behavior
- Medicare does not currently cover these products
- The medications indicated for diabetes will still be available to members with the appropriate diagnosis
- SISC currently excludes all weight loss drugs and has required a diagnosis code on GLP-1 agonists used for type 2 diabetes since October of 2022

Cost-effectiveness¹

- While Wegovy (semaglutide) and Saxenda (liraglutide) have proven to be clinically effective, The Institute for Clinical and Economic Review (ICER) has reviewed these products and found them not to be cost-effective
- ICER found semaglutide to be more beneficial and less costly than liraglutide
- When comparing health benefits and cost, ICER would consider semaglutide cost-effective at a price of \$7,500 - \$9,800 per year
- The annual net cost of semaglutide is currently \$13,618

Potential utilization

- Manufacturer guidelines for Wegovy and Saxenda recommend use for patients with a body mass index (BMI) of 30 kg/m² or greater (obese BMI)²
- If patients have weight-related health conditions the manufacturer recommends use at BMI of 27 kg/m² or greater²
- These medications are also now approved for children as young as 12
- Per 2021 CDC data, approximately 27.6% of adults in the state of California have a BMI of 30 kg/m² or greater³
- Example of increased utilization and spend from IPA's book of business:
 - Figure below applies to another association of school districts that have now elected to remove weight loss products from formulary entirely
 - Consortium shown below is about one fourth the size of SISC
 - If SISC showed similar growth, could have a spend of \$28.7 million per year (and rising)

- Current denied claims for SISC:

Month	Denied Rx Count	Cost Avoided
January	433	\$575,024
February	499	\$662,672
March	647	\$859,216
April	737	\$978,736

- There is already a clear trend demonstrating an increase in denials and potential spend
- Current denied claims likely underestimate what actual utilization would be
- Patients may know this benefit is not covered, if that changes these products will gain popularity by word of mouth

Long-term outcomes⁴

- The Step 1 trial, which studied weight regain after discontinuing semaglutide, suggests that these medications may be required chronically to maintain weight loss
- One year after discontinuing the medication, participants regained two-thirds of the weight lost
- Long-term utilization of these medications will incur more costs and potentially lead to side effects in the future

Alternative Treatment⁷

- SISC offers lifestyle programs through Vida as an alternative to medication (<https://www.vida.com/member/sisc/>)
 - Members can meet with a health coach or dietitian
 - In-app services such as food and exercise trackers
 - Information on different nutritional approaches and diet plans
 - Members see 7.4% weight loss in one year on average
