

Teachers and Instructional Aides generally receive their pay on a 10-month or 11-month pay cycle.

If a district provides a Summer School session, there are options for paying Summer School employees outside of their designated primary pay cycle.

Pay these employees using a 12-month Pay Cycle such as 1VAR-Certificated Various or 2VAR-Classified Various using one of the Options from the examples below. Or the new Pay Cycle 1SUM – Summer School for pay in June, July, or August for summer school.

**OPTION 1**

***HR/Payroll – Employment – Employee Management – Addon Tab***

- Select which Addon to use.
  - Use existing Addons already setup for certificated or classified daily or hourly time and input a 12-month Pay Cycle; or
  - Use existing Addons already setup for certificated and input the Summer School Pay Cycle; or
  - Create an Addon specifically for summer school.
- Attach the existing or Summer School Addon to employees working the session.

**OPTION 2**

***HR/Payroll – Employment – Additional Pay  
(input data directly into Additional Pay)***

- Add summer school employees into the Additional Pay-Batch Info Tab screen with a 12-month Pay Cycle or the Summer School Pay Cycle (not the employees' 10-month or 11-month primary pay cycle).
- Setup the employees' applicable Addons and Budget accounts in advance to reduce the amount of data entry necessary in June, July, or August.

**OPTION 3**

***HR/Payroll – Employment – Additional Pay  
(using a spreadsheet to import data)***

- Create an Additional Pay spreadsheet for the summer school time. Use the template provided by Escape. Use a 12-month Pay Cycle or the Summer School Pay Cycle (not the employees' 10-month or 11-month primary pay cycle).
- Test the spreadsheet format by importing a small amount of data into the Additional Pay activity.
- Populate the spreadsheet with each summer school employee's information including Addons and Budget accounts in advance to minimize data entry in June, July, or August.
- In June, July, or August input time units for each employee into the already prepared spreadsheet.
- Import the completed spreadsheet into the Additional Pay activity.

## Example

**Pay Cycle in Additional Pay/Batch Info Tab must be a 12-month Pay Cycle or the Summer School Pay Cycle when manually inputting or importing employee data**

*(Verify correct Fiscal Year, Pay Date, and Pay Cycle before inputting or importing data)*

The screenshot shows the 'Additional Pay Entry Batch # 1392167, Status: Posted' window. The 'Batch Information' tab is active, showing the following details:

- Batch Information:**
  - Fiscal Year: 2018 (2017/2018)
  - Pay Date: 7/31/2017
  - Location: July Summer School
  - Submitted: 7/20/2017 8:37:39 AM
  - Submitted By: July Summer School
- Posting Information:**
  - Primary Pay Cycle?: No
  - Pay Cycle: ZVAR (Classified Various)
  - Pay Period: 1 (Paid 07/31/17 (Closed))
  - Status Message: Posted 158 additional batch pay items.
  - Posted: 7/24/2017 10:30:12 AM
  - Posted By: 32PERE2P
  - Locked Count: 156

Red arrows in the image point to the 'Fiscal Year', 'Pay Date', and 'Pay Cycle' fields, indicating they are critical for manual input or import.

## Example

**Additional Pay Batch import results**

The screenshot shows the 'Additional Pay Entry Batch # 1392167, Status: Posted' window with the 'Batch Information' tab selected. Below the tab, there is an 'Export' button and a table of employee data. The table has the following columns: Employee, AI, Add On Code, Units, Effective Date, Rate 1, Description, Dys Wkrd, FF-RRRR-Y-GGGG-FFFF-OOOO-SSS-MMMM-UU, Type, PC, Salary Sched, Sched cell, Rate 2, Job Category, and Job Class.

Employee	AI	Add On Code	Units	Effective Date	Rate 1	Description	Dys Wkrd	FF-RRRR-Y-GGGG-FFFF-OOOO-SSS-MMMM-UU	Type	PC	Salary Sched	Sched cell	Rate 2	Job Category	Job Class
